Entry Guide

The entry side of the machine will be equipped with guide table and the guide wheels bar which will be responsible for centering the leading ends of the strip into the first pass.

Mill stands

The stands are mounted on the bed of the machine the line alignment can be easily done due to guide ways arranged on the bed of the machine. Each forming head consists of a fixed housing and sliding type out board housing. The mill stands will be arranged to locate shafts mounted on anti-friction bearings. For the top shafts the bearings are housed in the cartridge type bearing blocks. The bottom shaft bearings are located in the bored machined in the housings. The bottom arbors are fixed in position whereas the top arbors along with cartridge blocks could be raised or lowered in vertical guides machined in housings.

Roll shafts

The roll shafts will be manufactured from quality steel and will be keyed to locate tooling.

Drive

The drive to the roll former will be by means of a gear box system. The main drive will be provided by means of 25 HP motor. The speed of the roll former is fixed.

Delivery runout table

The delivery runout table is with four meters length.

Cutoff unit

The cutoff unit with hydraulic press along with cutting die set will be placed in the machine delivery side.
